

Denna anteckningsbok ("den svarta boken") tillhörde Einar Petersson ("Syr-Einar") som jobbade med etsning på Kosta under 1920-30-talen. Själva boken är inte daterad.

Vi fann den, tillsammans med "den vita boken", i en låda som stod intill den stora pantografen. Tyvärr föll en del kalkerade mönsterlappar ur innan vi förstod vad som hände.

Boken innehåller drygt 160 guillocheringsmönster, vissa med vad vi tolkar som "recept" (alltså instruktioner för uppsättningen av maskinen), samt ungefär 60 pantografmönster. Tyvärr finns inga servicenamn.

Mönstren är kalkerade direkt från glasen – med varierande resultat, och varierande "läsbarhet".

Boken är 19 x 12 cm, så originalet är mindre än denna publikation.

Vi har delat den på två filer, BGM_01_840A-svarta-guillocherat (denna) och [BGM 01 840B-svarta-pantograferat](#). (Se också "den vita boken", [BGM 01 841-vita-guillocherat](#).)

This notebook ("the black book") belonged to Einar Petersson ("Acid-Einar") who worked in the etching shop at Kosta in the 1920-ies to 30-ies. The notebook itself is not dated.

We found it together with "the white book" in a box together with the big pantograph. Unfortunately some of the rubbed patterns fell out before we understood what was happening.

The book holds a little more than 160 guilloché patterns, some with what we guess are "recipes" (instructions for how to set up the machine), plus circa 60 pantographed patterns. Unfortunately there are few service names.

The rubbings are done directly on the glasses – with varying results and varying "readability".

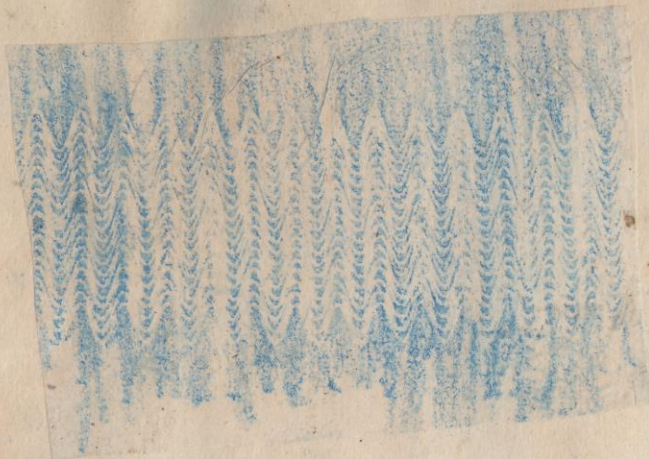

The book is 19 x 12 cm, so the original is smaller than this publication.

We have divided it into two files, BGM_01_840A-svarta-guillocherat (this file) and [BGM 01 840B-svarta-pantograferat](#). (See also "the white book", [BGM 01 841-vita-guillocherat](#).)

Guise Petersen
